

Day 8:

Another day, another failure.

Day 12:

Success, we have managed to resurrect a skeleton, it has no brain but it is a start.

Day 14:

Progress has been swift, we can now grow flesh on these skeletons using fresh bodies. I can only hope that Seral's team has managed to solve the soul bonding issue.

Day 17:

Granz has gone to Burthan Hole with a copy of our notes, they should help Seral in her endeavors. In a stroke of luck Alkahn has donated his flesh for our tests. We will not need to hunt for flesh for a few days.
